EDUCATION

- KIT's College of Engineering** Kolhapur, India
 - Bachelor of Technology – CSE (Artificial Intelligence and Machine Learning) — GPA: 8.65* 2022 – 2026
 - Courses: (Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases)
- AnnaSaheb Dange Medical and IIT Academy** Ishwarpur, India
 - 12th Grade — Percentage: 74* 2021 – 2022
- Vidyaniketan English Medium School (Ishwarpur)** Ishwarpur, India
 - 10th Grade — Percentage: 88* 2019–2020

SKILLS SUMMARY

- Languages:** Java, Python, SQL, C, JavaScript
- Data Science and ML:** Pandas, NumPy, Scikit-learn, Streamlit
- Databases:** MySQL, PostgreSQL, SQLite
- Tools and Platforms:** Git (basic), Power BI, Tableau
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

PROJECTS

- AI-Powered Chatbot System for Automated Resume Screening and Feedback (Artificial Intelligence, NLP, Automation):** Developed an AI-powered chatbot to automate resume screening and candidate feedback as part of an academic project. Implemented NLP techniques to extract skills, experience, and keywords from resumes and matched them against job requirements. Generated automated feedback highlighting candidate strengths and missing skill areas to reduce manual screening effort. Tech: Python, NLP, Streamlit, SQL
- CareerForge – Resume Builder Web Application (Web Development, Frontend, React):** Built a responsive web-based resume builder with real-time preview functionality. Implemented reusable React components, dynamic form handling, and section-wise resume generation. Focused on clean UI design, usability, and client-side data validation. Tech: React.js, JavaScript, HTML, CSS, Chakra UI
- Marks Analyzer and Course Recommendation System (Web Development, Database Systems):** Developed a web application to analyze student academic performance using structured marks data. Designed relational database schemas and implemented SQL queries for efficient data storage and retrieval. Built rule-based logic to recommend suitable courses based on students' performance trends. Tech: HTML, CSS, JavaScript, MySQL
- Multiple Disease Prediction System (Machine Learning, Data Science):** Built machine learning models to predict diabetes, heart disease, and Parkinson's disease using clinical datasets. Applied Logistic Regression and Support Vector Machines (SVM) for classification tasks. Performed data preprocessing, feature selection, and model evaluation using accuracy metrics. Tech: Python, Pandas, NumPy, Scikit-learn, Streamlit

VOLUNTEER EXPERIENCE

- Vice President – ACADS (CSE AIML Student Association)** Kolhapur, India
 - Led a team of 50+ members to organize technical and career-focused events for AIML students.
 - Increased participation in the flagship “Beyond Resume” event from 180 to 400 registrations.
 - Coordinated with faculty, speakers, and student teams for smooth event execution.
- Entrepreneurship Cell Representative (ECR) – E-Cell** Kolhapur, India
 - Selected as an E-Cell representative during the first year.
 - Assisted in organizing entrepreneurship-focused events and student activities.
 - Collaborated with core team members for event coordination and student outreach.
